CMS Station Brokerage Chooses Velocity Radio Management for Station Operations

Pittsburgh, PA - CMS Station Brokerage announced today that it will offer Station Operation services to its clients using radio station operator Velocity Radio Management.

Velocity Radio Management will work with CMS Station Brokerage clients to maximize station profit potential.

“CMS Station Brokerage provides brokerage, assessments and appraisals for radio stations. Adding ‘Operations’ to our lineup provides our clients another valuable service. Many stations need to focus on maximizing their revenue - both traditional and non-traditional - as well as discovering efficiencies which will improve their bottom line”, Roger Rafson, President of CMS Station Brokerage, said.

“We’re thrilled to work with a broker of such stature.” Tony Renda, CEO of Velocity Radio Management said. “We look forward to driving profitability and increasing asset value for CMS Station Brokerage’s sellers and buyers. Also, because these are challenging times for every operator, we’re here to help defend and guide stations that face the major task of bank restructuring/workouts or acquiring new capital.”

About CMS Station Brokerage

CMS Station Brokerage is a media brokerage service that helps radio station owners sell their radio stations to qualified buyers. They also help buyers find radio stations which make sense to meet their objectives. CMS Station Brokerage specializes in providing radio brokerage services for broadcasters in small and medium sized markets across the USA. They also do radio station appraisals for lenders, station owners and broadcast attorneys. Roger Rafson, President of CMS Station Brokerage and Commercial Media Sales, has extensive knowledge of the small and medium-sized markets. Over the past 27 years, Rafson has worked with radio station owners at over 2,000 radio stations. More information about CMS Station Brokerage is available at www.CMSStationBrokerage.com.
